Saudi Statement Helps

Dollar Edges Higher On Gold-Sale News

today in uncertain foreign-exchange dealings, reacting to a U.S. announcement of increased gold sales and to expressions of confidence in the ailing currency by Sau-

Gold prices fell sharply, howev-er, following the U.S. Treasury's announcement late yesterday that it will increase the amount of gold offered at its monthly auctions to 750,000 ounces from the current ≈ 300,000 ounces.

A Treasury official called the But if r move one of the series of actions nounced promised last week to bolster the trouble. sagging dollar. The expanded auctions, which will run for four months beginning in November, will be conducted in dollars, the Treasury said. There had been speculation that foreign-currency hids might be invited and that the funds raised would be used to prop up the dollar in foreign-exchange

trading.
The Treasury noted that "at the current price [of gold], the balance-of-payments benefit would be more than \$1.8 hillion at an annual rate. The continuing sales will also represent further progress toward elimination of the international monetary role of gold."

Below \$200

Meanwhile, gold ended the day at \$201.05 an ounce, down from its \$206.30 close yesterday but up from its morning fixing in London at \$198.35 an ounce—the first time it fell below the \$200 level that \$100 level of the first time it fell below the \$200 level that \$200 level of the \$200 level that \$200 leve \$200.20 an ounce in the afternoon.

The dollar was also helped, dealers said, by the statement by Prince Final Fand, brother of Saudi Arabia's
King Khaled. He reaffirmed his
country's faith in the dollar, and be said that Saudi Arabia was op-posed to using the proposed basket currencies as a substitute for the

dollar in pricing oil.

During the day, the dollar edged up to its best level in more than two weeks against the Swiss franc and

Hammer Dedicates Plant

In Huge U.S.-Soviet Deal

LONDON, Aug. 23 (AP-DJ) — the Deutsche mark. But selling the dollar finished generally higher pressure on the dollar from the Mideast and European centers began to dominate the foreign-exchange market Later, U.S. banks entering the market tended to offer the U.S. currency, accelerating its late decline from the day's highs,

traders said, Compared with last week, the dollar is relatively firm," a dealer remarked. "But people are waiting for more measures from the U.S. This may take some time, with Washington officials on holiday. But if no more measures are announced soon, the dollar will be in

Plenty of Sellers

Although many operators were besitant to sell dollars short at these historically low levels, "there were plenty of sellers around, in Europe and the Mideast," a trader

This, he said, reflected both the continued lack of confidence in the dollar as well as the effect of the U.S. trade deficit. One partially offsetting factor, however, is the attraction of high U.S. interest rates,

Against the mark, the dollar hardly moved after West Germany announced a sharply reduced trade surplus in July. The dollar finished at 2,0080 marks, up from 1,990 marks late yesterday but below its intraday high of 2,0230 marks. Some dealers noted that the dollar has recently traded within a range of 1.9875 to 2.0225 marks, or parrowly around the 2-mark level.

They speculated that Bundesbank support could be providing the dollar with a floor at the lower end of the range and selling from Europe and Mideast could be providing a ceiling. They added that the dollar could therefore remain within this range until U.S. intentions toward supporting its curren-cy become clearer.

Unless U.S. officials make a further statement on the dollar, or take further action, trading is ex-(Continued on Page 7, Col 7)

PARIS. Aug. 23 (NYT) — France to Pakistan's military ruler. Gen. Mohammed Zia ul-Haq, who revide Pakistan with a nuclear reproved its comenis today. vealed its contents today.

"The letter was very polite," said Gen. Zia, in a press conference held in Rawalpindi, "But in military terms we would say that, although it was full of sentiments, it was a lemon. For more than a year, the French government had been seeking a change in its contract with the Pakistanis. Last September, France proposed to Pakistan a modification in the fuel reprocessing plant to insure that it would not produce pure plutonium.

According to French officials, under this proposed new process it would have taken Pakistan 15 to 20 years to use the plutonium. But the Pakistanis rejected any major change in the original specifica-tions of the plant.

Gen. Zia, in his press conference today which was reported here, re-peated that his country had "assured everyone we have no reason to wish for nuclear proliferation, but we cannot stay behind other

nations in nuclear technology." Pakistan had also been under pressure from the United States, which threatened to cut off all but humanitarian aid if the reprocess-

ing plant was delivered according to its original specifications. Widespread Fears

The French-Pakistani contract

for the nuclear installation, signed in 1976, came two years after India exploded a nuclear device. There had been widespread fears that Pakistan would divert plutonium from the reprocessing plant and seek to build a nuclear bomb to counter India's breakthrough. On a visit to India last January,

President Carter tried unsucessfully to convince Prime Minister Morarji Desai to accept stronger interna-tional safeguards for India's nuclear energy program.

But a few days later on a visit to France. President Carter elicited a sympathetic response from President Giscard d'Estaing on the dangers of nuclear proliferation posed by the reprocessing plant for Paki-

U.S. Reportedly Destroyed Test Missile With Laser Beam

By Malcolm W. Browne

NEW YORK, Aug. 23 (NYT) — In the first successful demonstration of its kind. U.S. military scientists are said to have destroyed a high-speed missile in flight using a powerful prototype laser-beam weapon.

The successful test was disclosed in an article by Philip Klass in

the journal Aviation Week & Space Technology, through which the Department of Defense frequently publicizes technological devel-A laser weapon powerful, practical and cheap enough to deploy against missiles could revolutionize existing concepts of defense

and military strategy. In theory, it could neutralize such primary attack and deterrent systems as submarine-launched ballistic missiles and land-based intercontinental missiles, and all such systems could become obsolete overnight. Conventional missiles or projectiles take a certain amount of

time to teach a swiftly moving group of targets. During this time, errors may deflect the trajectories of the anti-missile missiles, and the enemy may have time to take countermeasures to disable the anti-missile desense.

Instant Destruction

A laser defense could destroy the incoming warheads or missiles

instantaneously.

The successful test reportedly was conducted "some time earlier this year" at the San Juan Capistrano, Calif., facility of the Defense, and Space Systems Group of TRW Inc., which had built the laser for the Navy and the Defense Advanced Research Projects Agency. The "death ray" has been a familiar weapon in the arsenal of

science fiction for many years. But despite rapid developments in laser technology, many scientists had assumed that real death rays in the form of laser weapons were still a long way off. In fact, a Pentagon spokesman said that the development of laser weapons was still "very much in the feasibility study stage," and "we still don't know whether they will prove in the long run to be Although the Navy appears to be the prime mover in current laser weapons research, all three services are interested and involved, and the Air Force is to conduct high-power laser tests against drone targets next year.

The spokesman emphasized that the recent California test had involved a "test bed" and not a working weapon, and that "dramatic though it was, its intention was mainly to test the effectiveness of the pointing and tracking system." But the dramatic success of the San Juan Capistrano test appears

to demonstrate both the potency of the laser weapon and the accuracy of the pointing and target-tracking system that was developed hy Hughes Aircraft Co. The laser reportedly used deuterium fluoride gas as the "lasing"

medium. Deutenum is a form of hydrogen containing an extra neutron in addition to the single proton in its nucleus. Deuterium fluoride is thus chemically similar to hydrogen fluoride a dan-Beyond saying that the laser emitted light at a wavelength of 3.8 microns, and was of "relatively moderate" power, the spokesman

declined to disclose any of its other characteristics on grounds of The spokesman noted that a "high energy" laser is defined as one with an average power of at least 20 kilowatts or a pulsed power of at least 30 kilojoules. The power of the California test laser was

presumably lower than these values. Although officials said that major doubts remain about the future of the laser weapons development program, they said that the program could possibly produce a weapon by 1982,

The Defense Department spokesman said that successful tests of laser devices as anu-aircraft weapons had been carried out by the Air Force in 1973 and by the Army in 1976, against winged or helicopter drone aircraft. But the latest less was the first in which a high-speed missile was destroyed.

The word "laser" is an acronym for "light amplification by stimulated emission of radiation." Like ordinary light, laser light can be produced in various

wavelengths (colors) and intensities. But unlike ordinary light, laser light is emitted "coherently" at an exact, single wavelength.

A laser beam travels in a straight, intense beam, unlike the spreading, diffuse beam produced by ordinary light. Because of this special characteristic, the light in a laser beam retains most of the energy it started out with, and can carry that energy over relatively great distances. Laser energy is converted to intense heat when transfered to the target at which it is directed. Many uses have been found for lasers.

Surgeons use them for making ultra-fine cuts in tissue. Chemists use them to study rapid molecular reactions.

Lasers are common tools for metallurgists, research scientists developing nuclear fusion energy, atomic weapons makers, discotheque owners and clerks taking stock inventones in super

They have also found many military uses, such as aiming heams on which guided missiles can be directed to their targets.

Although laser beams conserve much of their initial energy, the problem of imparting enough energy in them to explode an enemy warhead, destroy an enemy missile or plane, or kill human beings, has proved formidable.

Some reports have suggested that the Soviet Union was significantly ahead of the United States in laser weapon research, but a (Continued on Page 2, Col. 3)

Guerrillas Kill 9 Soldiers

UN Aide Leaves Namibia With Ideas on Transition

By John Burns

(NYT) — The first step toward a United Nations-supervised transition to black majority rule in South-West Africa (Namibia) was completed vesterday when Martu Ahtisaari of Finland, the UN special representative for the territory, left for New York to report to Sec-retary-General Kurt Waldheim.

After a two-week visit, the Finnish diplomat carried with him a range of recommendations for Mr. Waldheim on the steps necessary to implement the Security Council's plan to end South African rule of the territory. The plan, approved last month, would make the territory an independent African state called Namibia next year. [Nine South African soldiers

were killed early today in a guerrilla attack on two small towns, the South African Defense Department said, according to the Associated Press. The nine were killed by a single shell during a two-hour artillery duel with the South-West Africa People's Organization (SWAPO) guerrillas, who began their barrage from bases in Zambia, defense beadquarters in Pretoria

[It was the most South African deaths in one engagement since the war began and the first guerrilla use of artillery and rockets.

Before boarding his U.S. military transport outside Windhoek, the territory's capital. Mr. Ahtisaari read a statement emphasizing the efforts that his delegation had made to overcome suspicions among local political groups. The territory's 90,000 whites, in particu-lar, have accused the United Nations of favoring SWAPO.

"I am particularly beartened by the fact that all the parties I contacted acknowledged the cardinal importance of our mandate within the Security Council resolution," Mr. Ahtisaari said. "In this connection I should like to think that my mission has made a positive contribution in dispelling the initial misgivings about our impartiality by parties who are not familiar with operations of this nature by the UN secretariat.

Mr. Ahtisaari's departure followed a final three-bour meeting with Marthinus Steyn, the South African administrator-general, who with Mr. Ahtisaari will oversee the transition to black rule. Under the UN plan, the two men, assisted by a UN peacekeeping force and a corps of civilian administrators from the world body, will seek to negotiate a cease-fire and hold a one-man, one-vote election among the territory's 860,000 people.

At a reception given by Mr. Steyn Monday night, neither man attempted to obscure differences over key aspects of the independence plan, which could yet prompt the South African government to halt the process and adopt an independence scheme of its own that would exclude SWAPO.

A major stumbling block could be the timing of elections. The UN plan calls for two rounds, the first to establish a constitution-making body, the second for a black government. South Africa has interpreted the plan as requiring com-pletion of the entire process this year. Mr. Ahtisaari and his officials have indicated that the earliest practical date for independence will be sometime next year.

The dispute aligns the South Africans with a political grouping of white moderates and conservatives and black tribal leaders known as the Democratic Turnballe Alliance. The alliance favors early elections.

SWAPO, noting a provision in the UN plan for a seven-month transitional process, has insisted that elections be deferred until after the end of the year. The nationalist group, which has maintained an internal political network while fighting South African forces, has been limited in its campaigning by restrictions on mobility and free speech imposed by the authorities.

Another problem involves the registration of voters. Before the Security Council approved the independence plan, South Africa undertook a registration drive that attracted more than 80 percent of an

U.S. Reportedly Blew Up Test Missile With Laser

(Continued from Page 1) Pentagon spokesman said in an interview that defense estimates did not indicate any "laser gap."

The Pentagon's disclosure of its der study here and in the Soviet

anti-missile laser test is presumably an intentional signal to the Ruswell advanced.

and that a number of significant many and that a number of significant many kinds of machinery and laser developments in recent years have been the work of Soviet sciennuclear explosion.

Official misgivings about the ul-timate practicability of laser weap-ons are based on two things. First, Pentagon experts say, target acquisition and tracking sys-tems have become so accurate and

reliable (partly as the result of laser technology) that conventional shells and missiles are more effective than before. Second, laser beams are impeded

by atmospheric obstacles such as clouds, haze and the dispersing power of clear air. Lasers can theoretically be

boosted to such enormous power as to burn holes through clouds, but the energy required is enormous, and may be much more expensive will then be presented to the voters than the cost of bringing down tar-

Union: the particle-beam weapon. A particle beam is essentially the sians, among others, that this askind of beam produced in the labo-pect of U.S. defense technology is ratory accelerators that are used for studying the nuclei of atoms and Nevertheless, U.S. experts nuclear particles. A beam of pro-concede that the Soviet Union is tons, helium nuclei, neutrons or spending more for research on laser other particles accelerated to high weapons than is the United States, energy can be as destructive to

> According to one proposal, a combined laser and particle-beam weapon would use its laser component to bore through the atmosphere to the target, and the particle beam would then be shot through the resulting "tunnel" to destroy the target.

> It seems most likely that laser and particle-beam weapons will eventually be made for use in space. Since space is a vacuum, there would be no atmospheric obstacles to blunt the destructiveness of such weapons.

Although the Navy appears to be the prime mover in laser weapons research, all three services are interested and involved. The Air Force is scheduled to conduct high-power laser tests against drone targets next year. The Aviation Week & Space

Technology report quoted a "senior Pentagon official" as saying that if a decision had to be made today as to whether or not to begin immediate development of a laser weapon system, "the answer would be no." But another Pentagon official was quoted as saying that "the prospects [for developing a laser

weapon] are encouraging enough so that we do not want to turn the program off."

"Perhaps by 1981 or 1982, when we make the same cost-effective-ness tradeoffs, we will get a different answer," he said,

at the CIA from March to November of last year,

In his capacity as watch officer, he received and relayed top-secret messages. He also bad access to the storage drawer where the manual was located. Sources said be told the FBI that be put the document in the inner pocket of his sports coat one day and took it bome. Although intelligence-communi-

ty officials have voiced fears about proceeding with the case because of the classified material involved, there seems little doubt that the Justice Department will move to indict Mr. Kampiles. "We fully in-tend to go forward." a spokesman said yesterday.

Sources close to the CIA said they were surprised that a watch officer had access to a document describing what is generally regarded as the most secret intelligence satellive built by the United States.

vormany, these documents are kept in a safe and are never kept anywhere near a watch office," one source said. The multibillion-dollar Big Bird

satellite program is managed joint-ly by the Pentagon and the CIA. In the last five years more than a dozen of the satellites have been launched into a polar orbit that takes each of them over the same place on earth every two weeks. The satellites are equipped with

cameras that take black-and-white,

color and infrared photographs. The cameras send their photos back electronically." The resolution of these cameras is superb," one source said.
"There's almost no way you can camouflage things or hide things

from these cameras. The satellites follow orbits that take them as close as 90 miles from the earth. Normally, their low points occur over the Soviet Union. The 12-ton satellites carry engines that can lift them into higher orbits

and enough fuel to keep them in

was set by Moslem fanatics who oppose reforms initiated by Shah lobammed Reza Pahlavi. The Abadan police chief, Brig. Gen. Reza Razmi, denied making a

100 Held In Managua

(Continued from Page 1)

Managua airport was closed to all A score of Sandinista National Liberation Front guerrillas stormed the palace, which houses many government offices and both houses of Congress, during a session of the Chamber of Deputies yesterday afternoon. The raiders wore uni-forms similar to those of the national guard. At least 50 Sandinistas are believed to be jailed in Nicaragua. The raiders also de-manded their release.

Other demands included publication of the Sandinita position in all newspapers and over radio stations and'a 50 percent salary increase for

striking bospital workers.
Hundreds of persons were in the
palace when the attack began. For
the next two hours military helicopters hovered over the building. Their gunners traded shots with the guerrillas, and national guardsmen on the ground fired through the palace windows. Then the fighting tapered off, with the guerrillas barricaded inside with their captives.

'Situation Is Grim' A close adviser of President Somoza said that the president told him in a telephone call, "The situation is grim. Things are pretty

His Research Linked Chemical to Cancer

U.S. Expert Cool to Nitrite Ban

By Victor Cohn

WASHINGTON, Aug. 23 (WP) - The scientist who concluded that the chemical sodium nitrite causes cancer in rats called yesterday for a go-slow policy in removing it from the nation's meats.

Dr. Paul Newberne of the Massachusetts Institute of Technology said in an interview that his research "definitely" should be con-firmed in other animals before any extensive ban goes into effect. Ni-trites are widely used in the meat industry as a preservative, and as a color enhancer.

Food and Drug Administration officials said yesterday that there are no current plans for more tests. although Dr. Newberne's report has been in FDA hands since June 5 and, according to Dr. Newberne,

further animal testing will take "three to four years."

The Newberne report and the resulting federal plan to begin removing nitrite from meats sometime next year have alredy aroused buge fears in U.S. agriculture. "The meat industry, especially the pork sector, is convinced removal of nitrites would result in their economic ruin," a Senate Agriculture Committee staff report says.

FDA Sought Study

It was in a \$500,000 four-year study commissioned by the FDA that Dr. Newberne, professor of nutrition and food science, found that one rat of every eight that was fed sodium nitrite developed a lymph cancer, and another one of every nine developed a possibly precancerous condition.

The findings led the FDA and the Agriculture Department this month to prepare proposed regulations to be income and the second s tions, to be issued this fall, calling for a gradual phaseout over "sever-al years" of all nitrites in foods, A 49-page joint FDA-Agricul-

ture Department action plan and summary of the nitrite issue flatly says that the Newberne study "shows that nitrite induces cancer when ingested by laboratory rais." An examination of the study made available by the government only last Friday — shows that it is more tentative than that. Dr.

"adverse," under "the conditions of 'Less Than Compelling'

Newberne calls the effect of nitrite

Later in the report, however, be speaks in a summary of "the some-what less-than-compelling case that nitrite is lymphanogenic in Spra-gue-Dowley rats," the strain he used. And he said: "While these observations require some consideration, the data are only suggestive . . There are suggestions, however, of sufficient magnitude . . to raise questions about the widespread use of relatively high concentrations (of nitrites) in our

food supply." The upshot, he said yesterday, is that his report has indeed raised a red flag about nitrites, but he also thinks that more animal tests - in other species of rats and in mice. hamsters or other animals - are needed. It is unlikely "but always possible," he said, that an effect

may be seen only in one strain and At the same time, he said, he

More Flights

LONDON, Aug. 23 (UPI) — The government said today that as of April I, all flights to and from Spain, Portugal, Gibraltar, the Canary Islands, Minorca and Ibiza will use Gatwick instead of London's main Heathrow airport.

The Department of Trade said that the reason for the change is to ease congestion at Heathrow, which is nearing the point of satu-

Gatwick, about 25 miles south of London, last year handled about 6.5 million passengers. The department said that it now is capable of handling up to 16 million passengers a year, after major expansion work in the last three years.

agrees with the phaseout plan so long as it starts with products where nightes are not really needed to prevent botulism, and are used only to enhance color and appear-

But any precipitous action is unwarranted, he said, and a total phaseout should be regarded only as a goal that can be reached only if other safe preserving methods are perfected for the two-thirds of all pork and one-tenth of all beef that now are treated with nitrite.

He said it may never be possible to remove nitrite from some products. This is particularly true, he said, for canned ham and possibly

nitrite they would have to be so overcooked that "no one would eat them," and freezing — a possible alternate method of preservation might prove too expensive.

As for more animal tests, FDA toxicologist Hyman Gittes said, "I don't know of any being planned at this stage. I don't know how you would start to plan anything until the [Newberne] study is evaluated in sonte detail."

"It's too soon to say whether more studies will be needed." said FDA public-affairs officer Nancy Glick, but the FDA is "eliciting scientific review" to find out.

Legal Ads in California Hawk Do-It-Yourself Law

By Robert Lindsey

LOS ANGELES, Aug. 23 (NYT)

— In a small avalanche of advertising by lawyers descending on Californians by way of their television sets and newspapers these days, there is a new arrival this week —
"TV Law Forum," which teaches
people how to write their own wills and contracts and even plead their

own cases in courts. "There is so much law that is fantastically easy: anyone who has acquired the ability to read and write and is able to follow instructions can do it and go right in the court and represent themselves," Kenneth Kahn, directing attorney for the Law Forum, said.

In a program developed by three legal secretaries, the Law Forum is offering seminars where lawyers tu-tor laymen how to bandle a wide variety of legal procedures themselves, ranging from writing wills to defending themselves in drunken-driving trials.

Cut-and-Dry Cases

"Drunk driving cases are so cut and dry that Clarence Darrow would advise you to plead guilty most of the time." Mr. Kahn said. Most people can handle their own defense and save a lot of money." The Supreme Court in June.

1977, ruled that state harriers to advertising by lawyers were unconsti-tutional. California has generated some of the most innovative ways of responding to the new license by wyers to advertise.

One group of lawyers has a storefront in a Los Angeles suburb that sells kits of information and legal forms to consumers.

And there are the so-called law clinics, the equivalent of cut-rate supermarkets, which advertise heavily on television and in newspapers.

report good responses from their advertisements. Other lawyers report that newspaper advertising has been less successful, but acknowledge that this may have been because they have tended in use small and obscure ads.

Troublesome Trend

The increasing amount of legal advertising on television troubles many lawyers who do not advertise, and most deplore the trend, claiming many consumers will regret ussuch services.

A Los Angeles County supervi-sor recently protested the newspa-

per ads of a lawyer who advertises powers in winning acquittals for al-leged murderers. The ad said his minimum fee for defending accused murderers was \$5,000 and listed 16 cases in which, he claimed, clients had received acquittals, dismissals, hung juries, or reduced sentences.

Sonte officers of the California Bar Association say they are wor-ried about the trend. But, noung that the American Bar Association recently sanctioned television advertising by lawyers and acknowledging that high unentployment among young lawyers is encouraging the trend, they concede the recent legal innovations probably will be followed by others.

The Law Forum, besides offering seminars to consumers on how to write wills and contracts, establish corporations and partnerships, file for bankruptey and take other actions, provides lessons on court-room demeanor and procedures for persons who represent themselves in civil-court actions, criminal misdemeanors, uncontested divorces and other actions.

Computer Contracts

Mr. Kahn said the program wilt marry classroom seminars to the abilities of computers and electric

typewriting systems,
"A lot of what goes into contracts and other legal instruments is hoiler plate," he said. "What we've done is computerize the boiler plate. We've got a divorce memory disk, a hankruptcy disk, etc.

"There are only so many varia-hles in each case. When people come into the sentinars, they will get a form in which they fill in the variables - it's sort of like painting by the numbers. Then we feed the variables to a computer und, using right disk, it will print out contract in a word processing type writer like a sceretary. Then we teach people how to file the cases and everything else they need to know. None of our services costs over \$100, and that includes con-

sultation with an attorney." What about the old axiom that anyone who represents himself "has a fool for a client?" Mr. Kahn

That's a myth made up hy attorneys. There are a lot of gar-den-variety things that any person can do without having to pay an attorney \$50-\$100 an hour to do it

The Assassinations

The murders of President Kennedy and the Rev. Dr. Martin Luther King Jr. have fomented a whole folklore of fearful fantasies. The assassinations that would not die, they have been called. Any responsible antidote to the fears should be welcome and, in theory, that's what the House of Representatives sought 18 months ago when it created a special assassinations committee. But a series of lurid leaks soon began to make that committee seem as irresponsible as the fantasies it was intended to inter. And that was before the committee's chairman and chief counsel began feuding.

Then, however, came a new chairman, Rep. Louis Stokes of Cleveland, and a new counsel G. Robert Blakey, a Cornell law professor. Abruptly, the leaks stopped and the committee's investigations took on new discipline.

Some fruits of those labors have become evident in the committee's careful questioning of James Earl Ray, complete with 10year-old laundry tickets. Having once confessed to killing Dr. King, he now contends that he was set up by a mysterious person named Raoul - which, the witness insists, is spelled R-O-U-A-L. The committee's rigorous cross-examination makes his claim of innocence seem as dubious as his spelling.

Though there are more Ray bearings to come in the fall, the committee has already earned credit and credibility for its handling of the King case so far. A sterner test lies immediately ahead. A 1963 tape recording has been found that may indicate four rather than three shots in the JFK assassination. Tests have now been conducted in Dallas. How the committee reports the results - and states its conclusions - will soon demonstrate its devotion to rooting out fantasy and finding fact.

Drought in the Sahel

Part of the Sahel region of Africa is suffering drought and famine again. That is the band of eight sub-Saharan nations, from the Cape Verde Islands to Chad, which suffered a devastating six-year drought in the early 1970s. As many as 100,000 people and more than half the livestock of those basically agricultural countries perished from the resulting famine. This year's drought, though severe, has not had a catastrophic effect. That is because both the Sahelian nations and the international community have learned the costly lessons of the previous drought: Early warning and an efficient response to widespread food shortages, plus a concerted regional and international development effort.

can reduce the impact of recurring droughts. The current drought and famine severely affect four Sahelian nations — the Cape Verde Islands, Gambia, Senegal and Mauretania. Those countries' appeals for emergency food supplies brought a quick international response. Led by the United States, other countries have shipped about 450,000 tons of food to the area. And, unlike the helterskelter approach of five years ago, the food apparently is being distributed efficiently and equitably. Most important, the relief effort is part of a larger regional development program sponsored by the Sahelian nations and a score of more advanced countries. Their aim is to reduce the region's vulnerability to droughts.

The goals of this unique international effort are as numerous as the needs of the Sahelian countries. They include: increasing crop production in the generally arid region; building thousands of miles of roads and a communications system for the region, which is larger than Europe but which has a population of only about 30 million, and bringing modern educational and health services to a population that still lives largely as its ances-

tors did a century ago.

The African, Arabic and Western nations that have pledged more than \$1 billion annually to the Sahel development effort, in addition to various bilateral agreements, have done so for more than the obvious and laudable humanitarian reasons. They want to learn how to check "desertification"- the spreading of desert land, which, in develop-ing countries, is often caused by efforts to modernize rapidly. Because of where it is, the Sahel is especially vulnerable to the rapid expansion of arid land. The widespread concern of developing and industrialized countries about this spurred the United Nationssponsored conference on the subject held in Nairobi last year. The Sahel is the first area of the world where the various techniques discussed during that conference are to be put to the test. Thus, the Sahel has become, in effect, a laboratory in which solutions are sought not only to desertification, but to a host of problems that affect developing nations - and, in one way or another, the developed nations, too.

THE WASHINGTON POST.

Nudes, Prudes, Strawberries

increasingly, what is sun worship to some is indecency to others. Squabbles over nudity on the beach are developing more and more often - in California, Maine, the Hamptons and now in the New York City Council. Councilman Leon Katz has introduced a bill to make nudity on public beaches subject to fines and up to 10 days in jail.

Katz says he is responding to constituents' complaints about nudity on the popular Manhattan and Brighton beaches and even about nude visitors to nearby towns.

Nude sunbathers are entitled to protection from busybody law enforcement - and from leering voyeurs. But protection of citizens' rights runs the other way, also. Public beaches are places where families should be able to go without risking offense.

By setting aside clearly separate bathing areas, other communities have been able to satisfy nudes, prudes and everyone in between. Common sense ought to make such a solution possible in New York as well.

Is there anyone who hasn't eaten the odd grape or berry while waiting in a supermarket line? That's not the same as walking off with a sirloin hidden in a handbag. But it must have seemed that way to the Maryland

supermarket that brought charges against Jacqueline Datcher for eating two strawberries in the store. She was convicted of shoplifting and sentenced to six months' probation and a half-day's work in the parks sys-

At about the same time, a judge in Winona, Minn., put a 7-year-old boy through a formal criminal trial. Why? Because the boy, who bad shoplifted a plastic squirt gun, needed to be taught a lesson. The security manager of the store involved says, "Anyone over the age of 5 — I arrest them. I feel they know better by then."

Is there some kind of mindless trend at work here, a growing willingness to abuse the criminal justice system on behalf of some absurd extreme notion of justice? We wonder how much it cost the Maryland and Minnesota taxpayers to pursue such cases. The squirt gun in question cost 29 cents. The berries could not have cost more than a nickel. And as for principle, what both cases seem most to demonstrate is not a passion for jusuce but a departure, in the summer beat, of common sense. To those who allow such costly trivia to clog the courts, a big raspber-

International Opinion

A Path Made Rougher

. The only remaining country with which Japan has sull to end a technical state of war is the Soviet Union, but the path in that direction is made rougher by the justconcluded Sino-Japanese agreement.

Moscow warned Tokyo that Soviet-Japanese relations would be adversely affected if the controversial anti-hegemony clause were included in the peace treaty with China. . .

But there appears to be no fundamental difference between the peace treaty's references to hegemony and the relevant clause in the 1972 joint Sino-Japanese communique normalizing ties between Tokyo and Peking.

Futhermore, there seems to be no real conflict with what Moscow included in a draft treaty of good neighborliness and cooperation that it had earlier wanted Japan to sign to open the door to a formal peace agree-

In fact, all these documents express opposition to any one country seeking domination over third countries.

Urbanization and Third World

By Jonathan Power

the reverse in Latin America, Asia

and Africa — services are parasites drawing odd coins from the casual passage of wealthier pockets. Shoeshine boys, sellers of tickytacky, messengers, cigarette vendors, tourist touts and porters eke

out a living, contributing only mar-

ginally to economic development. The proportion of the non-agricul-tural labor force engaged in ser-

vices in Latin American countries

is between 60 and 70 percent, in Europe and North America it is be-tween 40 and 50 percent.

Too Far Gone

al economic growth probably can-

not cure. It is too pathological, too

far gone, for the urban industrial

In an attempt to show just how

impossible the situation is, a study

by the Organization for Economic

Cooperation and Development (OECD) has made a calculation

taking the average situation pre-vailing in the developing countries: a manufacturing sector employing 20 percent of the labor force; the

unemployment rate and underem-

ployment rate together averaging 25 percent, and the increase in la-

bor productivity averaging 2.5 per-cent a year, the rate achieved be-tween 1955 and 1968.

it then calculates that in order to

absorb an increase in the labor

force of 3 percent a year, industrial production would have to increase

at the phenomenal rate of 18 per-

cent a year. And to eradicate within

a decade the existing rural and ur-

ban unemployment and underem-

ployment, the latter figure would

have to increase by 30 to 35 percent

a year (Yet even record-breaking Brazil has achieved only 15

percent. I The report not surprising-

ly concludes: "Thus, eradication of

general underemployment through the development of industrial em-

ployment is a practical impossibili-

BARBARA PRECHEK.

Americans, not

surprisingly, feel dispirited and diminished by the fall [of the dollar], as if it were a personal insult . . .

L ONDON — Will everything in America soon be cheaper than in Britain? To an Englishman returning from America, the comparative costs seem more surprising than ever, even after a 10-percent American inflation rate. Cars, gasolina meet and most foods houses. line, meat and most foods, bouses, land, machines, hotels and motels, even books — they are all likely to be cheaper than their British equiv-

It's a strange contrast with 10 or 20 years ago, when America was an extravagant experience for any European. Today, even for the Brit-ish, with their weak pounds, the United States seems a cut-price country; and for the Germans, Swiss or Japanese, it provides a of course,

course, visitors are easily or course, visitors are easily misled about the cost of living, and American residents face long-term costs that can be prohibitive, including anything to do with medicine and the law. Any personal service heaves in constitution of the law constitution of the law. vice becomes increasingly expensive, whether from a barber, a house cleaner or a baby-sitter. The dependence on cars generates extra costs, and at the bottom end of the scale a family can probably live more cheaply in England, without serious discomforts, than anywhere

Prices Misleading

Comparative prices are always misleading as a guide to the cost of living, if only because so many of the most important factors in life may be free, or unbuyable at any price; and many British pleasures and luxuries, such as walking in parks or through city streets, village life, clean air or comfortable trains, are much harder to find in Ameri-

Nevertheless, many ordinary visitors to America are amazed to find that the dollar can buy so much more than its equivalent in marks. francs or pounds, and that it should still stay so low. And it seems all the more surprising, as the Ameri-can economy looks more promising than that of many other countries. particularly Britain.

now reaping the results of this mis-taken advice - chronic food short-Of course, as the economists pa-tiently explain to the laymen, the ages, a demoralized countryside, a fall in the dollar has little to do fast-expanding urban slum populawith comparative buying power; tion and a growing inequality of the world is not a simple free-trade mechanism in which American The question is, can the Third goods can flow freely into Western Europe and Japan; and the dollar is the victim of the American trade World learn in time the lessons of this experience? Can it develop in a way that gives it time to hlend the deficit, the high oil imports and the best of its countryside with the best of urban life? It can be done, but consequences of OPEC price increases. But if America thus cononly if the countryside is used as the mainstream of its economy, tinues to be a bargain country, the

ing — particularly since the chear dollar coincides with unprecedent edly cheap air fares across the Atlantic Aiready this summer the Europeans have been flocking inunprecedented numbers to have cheaper holidays than they could enjoy on their own continent. By next year, when the airlines will have had to produce a more ration, al cheap-fare system, the European invasion will be in full flood.

Manhattan Transfer

And for those Europeans who are allowed to export capital— particularly the Germans—the at-traction of buying up hits of Amer-ica will increase. Already Manhantan is beginning to look as though in is slowly moving toward Europe, and both individuals and compa-nies from Europe see American investment as a refuge from their own crowded and anxious conf-

In the high counsels of the European Community, the decline of the dollar is seen as a strong incomrive to prepare for a European monetary union and a European currency to provide an alternative bulwark, which in turn will create a closer community. But the social and cultural trends that flow from travel and investment may well produce an opposite movement forging much closer links with

Second Thoughts

The American experience, even when it was a luxury reserved for the rich, bad always provided a powerful counter-pull to challenge Europe, Now that America is much more accessible, at a time when Europeans are having new doubts about each other's political stability, it may well provoke second thoughts — like an old lover reapppearing on the eve of the wed-ding, looking humbler but more attractive than ever.

Americans, not surprisingly, fed dispirited and diminished by the fall in their currency, as if it were a personal insult; and any English-man who has ever had to cash a devalued traveler's check will know how it feels. But the anguish may not be justified, not only because the dollar's huying power remains high in the United States (and no Western nation is less dependent on foreign trade), but also because the new accessibility of America may produce a much closer cultural relationship with the rest of the West. It may not be as satisfying to the ego as the old days of dollar consequences for its relations with Western Europe may be far-reach-healthier for that.

SALT—Learning From Past

By George F. Will

WASHINGTON - Fifty years VV and many wars ago, the United States took the lead in an effort to make war a thing of the past. On Aug. 24, 1928, representa-tives of 15 nations met in Paris to sign the Kellogg-Briand Pact, there hy renouncing the use of war as an instrument of national policy.

rather than the backwater.

West often argued that a develop-

ing industrial sector was the most effective way of attracting outside

The Third World countries are

capital.

Today the name Kellogg-Briand I today the name Kellogg-Bhand is like the memory of wind whistling in a chimney, in an old house, long ago. But it is wrong to regard the pact banning war as just another example of the featherheadedness typical of a nation that was simultaneously trying to enforce a ban on alcohol. It was more than a pale flame of idealism in the clospale flame of idealism in the clos-ing dusk of American innocence. It expressed aspects of the American temper that still exist.

Warren Harding, the first post-war president, declared, "I don't war president, declared, "I don't know anything about this European stuff," and left all such stuff to his secretary of state, Charles Ewans Hughes, whose successor was Frank Kellogg. In the mid-1920s, the State Department's staff of just 600 professionals disposed of a budget of just \$2 million. In Europe, the most ominous figure Europe, the most ominous figure was Mussolini, who preached the virtues of war to an inattentive

Most Americans did not care about foreign policy in the decade after the "war to end all wars," but there was a significant "peace movement," two ornaments of which were Columbia University President Nicholas Murray Butler and Prof. James Shotwell, also of Columbia. Shotwell suggested to Aristide Briand, the French foreign minister, that the United States and France should sign a treaty to 'outlaw" war.

Briand fastened upon the idea as a way of beginning to bind the United States in a bilateral relationship with France. But Briand did not anticipate Kellogg's deft-

Kellogg disdained the "peace movement." but Briand's offer compelled him to act and he knew a political opportunity when it was handed to him. Kellogg turned it into a multi-nation extravaganza. And by 1934. 64 nations had endorsed its provisions. A decade lat-

er, most were at war.

Prior to 1928, the last event that had stirred public interest in foreign policy had been "the first SALT talks" — the Washington

Naval Conference of 1921. The opening of the conference coincided with interment of the "Unknown Soldier," n ceremony broadcast nationwide by the magic of

Assumption

The assumption sustaining the Naval Conference was that naval limitations were the key to peace. A few years later, when the Senate ra-tified the Kellogg-Briand Pact, 85-I, that body promptly voted to authorize 15 new cruisers.

The pact banned only "aggressive" war; it lacked enforcement mechanisms; and the Senate For-eign Relations Committee tacked on an "interpretation" that affirmed the U.S. right to "enforce" the Monroe Doctrine.

Nevertheless, the pact satisfied those - and there are always many of them — who believed that diplo-matic parchment could do the work of blood and iron in guaranteeing national security. Kellogg received the Nobel Peace Prize in 1929.

Three Beliefs

As today's president understands 100 well, there is always an American audience for the theory that a particular problem is the intended result of scheming by this or that "special interest." In the 1920s, a significant audience was eager to believe that the "Great War" had heen caused by "munitions makers" and other "merchants of death." People who believed that were prone to believe that conspira-

cies of ill will would be blocked by open expressions of goodwill.

The Kellogg-Briand Pact accorded with three beliefs that recur is America: The world is in the "mood" for peace; moods are deasive; moods last. Anyone who are thinks that those beliefs died lost ago has not been paying attention to more recent history.
One critic, who bad a way with

wounding words, dismissed the Kellogg-Briand Pact as "an intr-national kiss." But it is not obvious that the pact was more vacuous more of an exercise in deception (including self-deception) or more of a dead letter than is the U.S. Soviet document explaining in principles of detente (1972) or the are the human rights provisions of the Helsinki accords (1975). In the year 2028, the assessment of the may be similar to today's assessment of the Kellogg Briand Pact worthless, but not harmless.

In Time of Prosperity

Malaysia Ethnic Worries Persist

By Jay Mathews

KUALA LUMPUR, Malaysia. Aug. 23 1WP) — The eoergetic young husinessman had found a good job in the capital of this rich. still-developing country. The pay was \$1,140 a month, but he could not keep the job without citizenship papers, something up to then de-nied him even though he was born

His was not an isolated case. For the ethnic Chinese and Indians who make up nearly half the population of this Malay-dominated state. rights of residence and occupation are often hard to come by.

The young businessman finally paid \$5,900 in bribes to obtain the proper papers. To get a noncitizen's work permit, he discovered, would have cost more.

This is a time of quiet and pros-perity for Malaysia, but many peo-ple wonder how long it will last, as ethnic divisions of this son continue to build up frustration.

After a resounding victory in

neral elections last mooth, the Malay-dominated National Front coalition that runs this country of 12.2 million seems to have well in hand the complex political feuds that Malaysians love.

Scattered Bands

The communist rebellioo that seriously shook Malaysia in the 1940s and 1950s has been broken up. Scattered bands of armed rebels. perhaps totaling oo more than 3,000 men, merely gave the National Front a convenient excuse to ban large rallies during the election campaign and thus bandicap the

parliamentary opposition. A light oil much prized by gaso-line-hungry Japan flows out of wells on the east coast of the peninsula that forms the western balf of Malaysia. The country remains the world's largest producer of un and natural rubber and finds a bealthy market for those products. All across the United States, hamburgers fry in oil extracted from squat palm trees that grow in neat rows

wrested from the green jungles and problems?" a young ethnic-Chinese mineral-rich hills of this former officer asked a Malaysian journalist British colony. But many doubt recently, It was a sentiment many that it is enough to smooth over the of his Malay colleagues shared, he deep racial problems left behind by said.

The army has been very important to be indian. laborers and Chinese shopkeepers

In 1969 the stiff, British-admir-ing bureaucrats who run this capital city were frightened out of their wits by a bloody riot of angry Malays, mostly directed against wealthier Chinese oeighhors. About 250 Chinese died, along with about 50 Malays and Indians.

Appoint Malays

The response of the government coalition, then as now committed publicly to racial harmony, was called the new economic policy—a plan of action intended to force greater prosperity on the easygoing but increasingly unhappy Malays. Universities began to reject Chi-

nese applicants in favor of less-qualified Malays. Foreign compa-nies were pressured to appoint Malays to their boards and to hire more Malay staff.

A key promise was that by the year 1990, at least 30 percent of the country's capital would be in Malay hands. In 1970. Malays had ooly about 2 percent. The figure has now climbed to about 8 per-

"I doo't know who is going to be prime minister to 1990," said an In-dian businessman, "but he's going to have to explain to the people that the new economic policy has failed. That will mean more riors, and the army moving in."

The small Malaysian armed ser-

vices are as racially mixed as the country at large, and trained in the strictly nonpolitical. British tradiare now going to oeighboring Asian states like Indonesia and Thailand, where generals have account to sandhurst for training, er. Lim Kit Siang, to apologize publicly for the slight.

"You are still in the stage of female

Businessmen and politicians wel-come the 7 percent growth-rate got more involved in the oation's

ant in the life of the quiet politician whose political skills brought last month's resounding mandate for the National Front.

Prime Minister Datuk Hussein bin Onn fought with the Britishtrained 16th Rajputana Rifles in North Africa during World War II. He then transferred to Delhi to do staff work for the allied campaign to retake Malaysia from the Japa-

Some Malaysian observers say that he does not hold a candle to his father, who founded the United Malays National Organization which now leads the National Front coalition. But Mr. Hussein's cautious attenuon to myriad poliucal details last mooth overwho a party of Islamic zealots that had threatened to weaken the coalition

He has tried to root out the official corruption that adds to the frustration of people like the young non-Malay businessman woo had

to pay so much for his citizenship.

Matters are oot helped by the cent, but at such a slow pace that many fear the 30 percent target can be reached in time only by juggling make up Maleysia, and who elect the composite of the the oatioo's king, the ceremonial bead of state. The sultans demand huge estates and other perquisites. They can still do some damage to democratic politicans because of the lingering Malay reverence for the old nobility.

When six newly elected state legislators of the leading opposition group, the Chioese-dominated Democratic Action Party, failed to swear an oath of allegiance to the tion. But many of the young offi-cers, who in the past would bave furor forced the party's astute lead-

> dalism if people in their 50s can re-member when the sultan's rule was absolute under British guidance," a businessman here recalled. One of the problems in controlling the drug trade is that the sultans are involved.

Hacked to Death

Prime Minister Hussein seems capable of bandling, however slow-ly and carefully, the sluggish mix of politics and corruption. It is the reigious issue that most frightens him and other politicians here.

LONDON. Aug. 23 (NYT) — are hrought into the main hall, the Billingsgate, the colorful fish market that has occupied the same site white-smocked porters, the older Outraged Indians recently hacked to death four Moslems. And religioo is a response to things not going well." says a diplomat.

Mr. Husseio managed ocarly lo

eliminate his most fervent Islamic opposition in the July election, but he bas had a personal reminder that his brand of moderate Islam may not satisfy the generations to come. His daughter, a fairly mod-ern young woman when she left for school in London, came back two years later wearing a traditiooal Moslem veil. It reportedly took a hands who love the place will con-tinue to say, as one did yesterday morning, "It's just rumors, isn't it?" great deal of persuasion to make her take it off.

Peru Military Takes Over Strike-Hit Mining Areas

LIMA, Aug. 23 (AP) — The mili-tary government declared a state of emergency in Peru's major mining regions yesterday, suspended civil rights and sent troops to try to end an 18-day-old strike.

It will be another year or two un-

til the fish merchants get through

Parliament their private bill releasing them from more than 575 years of city jurisdictioo, and until the

necessary \$10 million to \$15 million is raised for the move.

second millenium. And grizzled

Until then, the old market that now sports two big, fish-shaped weather vanes atop the terminal building will push further into its

operating the market since an 18-day-old strike.

The government estimated that the strike by about 45,000 miners was costing \$2.5 million a day in lost production. Union and compa-1400, and is reluctant to lose its authority - about 250 tons of fish continue to change hands at the ny sources said that soldiers en-tered the mining installations be-This is only about one-third of the trade done in the days before fore dawn. Armored vehicles pafish was frozen or prefilleted, but Billingsgate merchants say it re-mains the world's largest inland trolled the areas.

The armed forces joint command said that it had acted to normalize production of copper, iron, lead, silver and zinc in the areas. Troops its strength is in the selection it ing-service customers. About 45 were not operating the mines but were sent to maintain order.

varieties are handled regularly, including shellfish. They come from The emergency measures, which affect only the mining regions, alnearly all the ports of Britain and low military arrests and house from Scandinavia, the Continent searches without warrants. They give the military the power to prohibit citizens from entering or leaving the country, and to order Most are sold by the stone, a measure equal to 14 pounds, but premium fish such as sole and tur-

Pay, Amnesty Demands

The strike was called on Aug. 4 hy the National Federation of Miners and Metallurgical Workers, which has demanded higher pay, amnesty for labor leaders arrested in previous strikes and rehiring of miners fired for illegal strikes. A 1976 government decree bans

strikes in the mining industry because of its importance to the national economy. Metal exports account for 70 percent of the country's foreign earnings.

Only samples of the merchandise Union leaders have not specified their wage demands. Miners now carn between \$1.57 and \$4.69 a Charles to Visit Australia

Union sources said that union leaders were called to the Interior Ministry Monday night and met the labor minister. Lt. Gen. Jose

Garcia Calderon, and the minister of mines, Gen. Juan Sanchez.

Communications were difficult with the mining regions. A spokesman at the Lima headquarters of Southern Peru Copper Corp., a U.S.firm, said that all was calm at its installations in the far south. "A small group of workers have re-turned to their jobs and the compa-ny expects more to return as they realize it is in the interests of the country and themselves," the spokesman said.

The government said it acted be cause of "a climate of agitation intended to produce serious distur-bances in public order." It urgeo workers to return to their jobs vol-

The strike began shortly after the convening of a Constituent Assembly that is writing a constitution in lended to return the country to civilian rule through general elections before 1980.

Mine union chief Victor Cuadros, a former miner for Southern Peru, is an elected representative in the assembly. He and other leltists there have ealled on the military government to step down, and have urged the people to go to the streets to back their demands.

The government accuses the Cuadros group of using the strike for political ends.

The emergency measures were also applied at the southern port of llo, where Southern Peru and state owned Minero-Peru have metal lurgical installations, at the mine of the state-owned Centromin-Peru company in the central Andean re-gion east of Lima, and in the iron mines owned by the state corporation Hierro-Peru in Marcona, 275 miles south of Lima.

The affected operations produce more than 80 percent of the country's minerals.

Designer Charles Eames Dies in U.S.

VENICE Calif., Aug. 23 — Designer Charles Earnes, 71, perhaps best known for his molded plywood chairs, died Monday in St. Louis, where he went last week to supervise a botanical gardens design project. His death was tenta-

tively attributed to a heart attack. Praised for bis wide-ranging tal-ents. Mr. Eames was described two decades ago as a man who "has designed buildings and built them. placed them oo their site, furnished them, decorated them, photo-graphed them and organized fes-tivals to them, all with an equal

sense of discovery and delight."
One of his last major creations in
Los Angeles was "The World of
Franklin and Jefferson," a biceotennial exhibit previewed in Paris,
Warsaw and London before it toured the United States in 1976, Perhaps one of Mr. Eames' most famous exhibits was the sevenscreeo documentary film on how American people live, on perma-nent display at the American Na-tional Exhibition io Moscow in

But it was furniture that Mr. Eames seemed to like most and furniture that built his fortune,

"I've chosen to do things which one can attack and better control as an individual," he said in 1971.

The son of a St. Louis photogra-pher and painter, Mr. Eames worked as a grocery delivery boy, envelope folder, steel mill laborer and apprentice draftsman before be won an architecture scholarship to the city's Washington University — only to fail over disagreements with teachers who disparaged his idol, architect Frank Lloyd Wright.

Mr. Eames earned commissions for buildings and houses, traveled to Europe to study architecture and to Mexico to study sculpture. Re-turning to the United States, he became head of the experimental design department at Cranbrook Academy of Art in Michigan.

There he worked with Eero Saarinen in 1940 to create the first molded plywood chair, winning two first prizes to an international competition sponsored by the Mu-seum of Modern Art in New York. Artist Ray Kaiser made drawings of the chairs — she married Mr. Earnes a year later — and a few years after that, helped him develop the inexpensive molding process that made the chairs commercially

Mr. Earnes had worked as an MGM set designer and the couple was planning to auditioo as circus as an individual," he said in 17/1.
explaining why he had ceased designing buildings. "Furniture design or a film, for example, is a small piece of architecture one man small Los Angeles apartment required the Earneses to pedal a standard bandle." clowns to support themselves when

tionary bicycle, activating a pump that produced the compressed air necessary to bend the plywood. Decades of Projects

With profits from sales of the chair Mr. Earnes built their resi-dence, which he had designed, and financed three decades of projects. Although he worked in Los Angeles for 37 years, Mr. Eames often remarked that most of his clients came from east of the Mississippi,

He was asked to organize a me-morial exhibit of India's Jawaharlal Nehru in 1964, only a few years af-ter his successful U.S. presentation

In 1970, he expanded his talents to give the Charles Eliot Norton Poetry Lectures at Harvard University and was named to former President Richard Nixoo's National Council on the Arts.

Mr. Eames explained his interest in items ranging from toys to chairs to baked bread smells for films by

saying:
"The motivation behind most of the things we've done was either that we wanted them ourselves or wanted to give them to someone

Mr. Earnes, accustomed to his unusual range of talents, took the appointment to do the poetry lec-tures philosophically: "They give it to an off-beat fellow about every

Author Ignazio Silone, **Italy Communist Founder**

GENEVA, Aug. 23 (UPI) — lg-nazio Silone, 78, the Italian author who co-founded his country's Communist Party 57 years ago, died in a hospital last night after a long ill-

ness. Mr. Silone was the first Western Communist leader to break with Stalinism, in 1927.

Mr. Silone, whose real name was Ignazio Tranquilli, was born at Pescina in the Abruzzi mountains of central Italy on May 1, 1900. He was one of Italy's best known contemporary writers.

His parents were peasants and he was orphaned in 1919 when an earthquake devasted the Pescina region. He already had entered polities, writing pamhlets against cor-ruption at the age of 17. In 1921, Mr. Silone co-founded

the Italian Communist Party and carried out missions in the Sovier Union. Germany. Spain and France. In 1925, he took charge of

the clandestine party in Italy.

He hroke for good with communism as well as Stalinism in 1931 when he fled to Switzerland because of fascism in Italy.

In the following 10 years, Mr. Silone worked ahroad for Italy's Socialist Parry but in 1941 abandoned direct politics to depute his

doned direct politics to devote his

wine to writing.

His best koown books were
"Fontamara," which coincided
with his break with communism.
and "Pane e Vino" (Bread and
Wioe), both published in Zurich. In 1965 he published "Emergency Exit," a summing up of his political beliefs.

In his later years, Mr. Silone showed a growing interest for Christianity — he had attened a Roman Catholic institute as a child - and wrote "Story of a Poor Christian," a novel about Celestine V, the humble monk who resigned after four months as pope.

His realistic description of the plight of the peasant countrymen against fascism reported in Fontamara." brought him ioternational fame.

Tremor Jolts Taiwan

TAIPEI, Aug. 23 (UPI) - A slight trentor shook central and northern Taiwan today but no casualties were reported, the Central Weather Bureau said.

Nord LB-Result

For Norddeutsche Landesbank, in common with the greater part of the German economy, 1977 was a year of consolidation and steady progress rather than one of vigorous upswing.

Against this background the healthy trend of growth in all major sectors of our banking business and in our ordinary profit and loss account can be regarded as very satisfactory. The balance sheet total increased by 6,6% to DM 35.7 billion. Our volume of credit expanded to DM 25,0 billion. Gross sales of our own bonds amounted to DM 2,4 billion. The above together with net earnings for the year of DM 49,2 million show that 1977 was another year in which we made good progress. Norddeutsche Landesbank has, therefore, every reason to thank its business associates at home and abroad for their confidence they have shown in us and for the success to which they have contributed; and we do this with the promise to continue our endeavours, to improve further the facilities and services we offer in all sectors of banking and credit.

Hell Is No Longer the Burning Question It Was

By John Dart

L OS ANGELES — Not long ago Grand Ole Opry comedian Jerry Clower, a born-again Christian, urged a group of Baptist men in Atlaota to stick to the "basics" of the faith.

"The basics is that Jesus saves," said Clower, his befly form adorned in a fire-red suit and a fire-

red ruffled shirt.

"Keep it simple. Hell is hot.
Heaven is wonderful. Them that
knows Jesus is gonna miss hell and go to heaven," said Clower.
fn thinking of hell as an inferno. this former fertilizer salesman from Yazoo City, Miss., has something

in common with Dante. And Clower's fellow Southern Baptists, as well as many other religiously conservative Christians, generally would agree there is a literal place of punishment after

But even those people would concede that hell is not the burning question it once was.

Credibility Gap

The credibility of the fiery furnace has suffered recently from the widely read reports from neardeath and resuscitated patients who have had visions of heaven -

And traditional Christianity has been aware of eroding belief and gradual disinterest within religious circles in a place to sear sin-ridden Items:

• A study by priest-sociologist Andrew Greeley showed that while 70 percent of Catholics surveyed believe in life after death only one third of those questioned said that they believe in bell.

 A Gallup poil last February found that 54 percent of those polled believe in angels and 39 percent in devils. Most significantly, religion analyst Martin Marty says studies show that "only one in eight who believes in hell believes it is a threat to him."

 A Christian psycbotherapist says he sees 20 persons a week in group or individual sessions who often discuss their thoughts on death. "I don't remember a single one of them relating their death anxiety to a fear of how they're going to face the Judgment." says Neil Warren, dean of Fuller Seminary's graduate school of psycholo-

 Evangelical preachers and reachers today accentuate the positive - the heavenly rewards for believers and, especially, the happi-ness that faith can bring in this life. Hell is oot the conversion tool that it was 50 years ago. "In the five months I've been rating churches I haven't heard one sermon on hell." said religion editor George Plagenz, who "reviews" church services for

the Cleveland Press. · Hell suffers from inattention in liberal-to-moderate churches, which say they're more concerned about justice and morality in this life. Another reason given is the in-fluence of theologians like Rudolf Bultmann (1884-1976), who argued flections on 'Life After Life,' "he

Christian Science and Religious Science and believers of other stripes, is that the only "hell" that exists is created during ooe's lifetime by personal attitudes or actions. Evangelist Ruth Carter Stapleton, quoted to that effect hy a religious magazine last year but under criticism currently for al-leged uoorthodoxy, said recently that she believes that persons can experience hell "even before they

New Element

The oewest element in the pic-ture arises from studies in a conreligious field. Regardless of their uncertain status in scientific circles, "return-from-the-dead" accounts have concerned some churchmen

that the chureb is not bound to refers to an unspecified number of espouse an ancient view of cosmic suicide-attempt cases in which the geography "obsolete" for the 20th century.

The chureb is not bound to refers to an unspecified number of trust for the details: "No one knows just bow God will reward geography "obsolete" for the 20th patients described a gray zone the just in heaven, or precisely how where they viewed people aimlessly the damned will suffer in health of walking about though the experi ence was not oecessarily described as disturbing.

"It remains true that in the mass of material I have collected no ooe has ever described to me a state like the archetypical hell," Moody wrote. "However . . . nothing I have encountered precludes the possibility of a hell."

Not Proof. Say Critics

Critics of such research poiot out that the existence of another realm beyond death is oot proved by such testimonies. It has also been suggested that people are recounting imaginings from their own preconceptions of what an afterlife would

However, to talking to 100 patents who came close to death,

'The credibility of the fiery furnace has suffered recently from the widely read reports from near-death and resuscitated patients who have had visions of heaven - but not hell.'

Strikingly similar descriptions of a light-filled and pleasant realm have emerged from patient interviews conducted by physician-author Raymond Moody and death researcher Elisabeth Kubler-Ross and more recently by a Southern cardiologist and a Connecticut psychologist. Those interviewed were either near death at one point or were resuscitated after being declared clinically dead.

In a best-selling 1975 book, "Life After Life," Moody said some of the most frequently occurring im-pressions are that the person leaves the body, even "seeing" it from afar, feeling peace and quiet and being drawn through a dark tunnel, meeting other beings, often deceased friends or family, then seeing a being of light.

The light being emits warmth and love rather than blinding brilliance. All persons, religious or nonreligious, said that they were drawn to this light. Some Christians identify it as Jesus Christ.

about their effect on traditional Kenneth Ring, a psychology probeliefs.

Kenneth Ring, a psychology professor at the University of Connecticut, said he found almost oo correlation between a person's religious beliefs and what they described.

As in the other studies, many report "seeing" nothing. Of the approximately 50 who reported "experiences," Ring said, the descriptions were "completely consistent" with Moody's accounts.

Kubler-Ross, a widely sought speaker on dying and stages of grief but controversial for some of her recent views on out-of-body experimeots and other views, said in an interview that there are "thousands" of cases of people who tell another existence. "From all our accounts," she

said, "there is no evidence of a judgmental, punitive god that condemns us."

On the whole, however, such research "curiously... has not been given much attention by theological or religious journals and still less by preachers, clergy or church people," according to Theology Today, published at Princeton

Theological Seminary.

"Re- Catholie priest Hugh Calkins
"he says that the Christian must rely on

and infallifly deflored dogmas, many puzzling questions remain.

Catholic teaching about hell to-day generally tries to avoid giving the impression it once did that any wrong step or grave sin could mean sure damnation. Rather, bell is defined as punishment for those who consciously and consistently reject God. Catholie belief also includes an after-death way station called Purgatory, a place of passive suffering for souls whose sins have not been so bad that they cannot be purified and divine instice can be satisfied. One priest likens it to a "continu-

ing education center. Translation Factor

the damned will suffer in bell . . . What bappens upon the death of an individual is still hidden in mys-

Despite truths of revelation infallibly defined dogmas.

Hell seems mentioned enough in the Bible to be plainly interpreted by believers as a place of punish-ment, but biblical studies show a variety of words lie behind the Eng-lish translation bell."

In the Hebrew scriptures, the Old Testament to Christians, the word used is "sheol" and appears to be merely a grave for all the dead. Jews today generally believe the soul is immortal but reject an afterlife for a resurrected body.

The Jewish Talmud indicates an unclearly defined form of punishment for the wicked principally associated with fire, but a later Jewish sage, Maimonides, interpreted the punishment of the wicked as a denial of eternal life for them.

The rabbis of early Judaism used the term "Gehenna" (the valley of Hinnom) to refer to this "hell," and this is the term in New Testameot passages which have Jesus refer to "hell." The valley, outside of Jerusalem, was a burial place and, some scholars say, a place for hurn-ing refuse and the carcasses of ani-

The Greek words "Hades" and "Tartarus" also lie behind some New Testament translations of "hell." Some Greeks of that era ap-pareotly believed that Hades should have divisions: Elysian Fields for the righteous and Tartarus for the wicked.

Fad Looms From Unexpected Harvest

By Jane M. Friedman

DARIS (IHT) — The Europeans have done it again, They have taken a nondescript U.S. product — this time the name of an under-wear manufacturer — and turned it into one of the bottest-selling fads in Europe. All along the streets of Paris, on the beaches and in the ports of the Cote d'Azur, even as far as Japan, hip people are wear-ing cottoo T-shirts stamped Fruit the Loom Few seem to know what Fruit of the Loom means, but don't worry, c'est la mode.

Few seem to know

what Fruit of the

but not to worry,

C'est la mode.

Loom means.

"It's the hottest thing in Paris this summer," said Alain Djian, a salesman at the Venezia shop on the Left Bank's Rue de Buci. The shop, which stocks about a thousand Fruit of the Loom T-shirts and sweatshirts in all varieties hig or little emblem, in many col-ors, says it sells tens, and some-times hundreds, of the shirts each day. The T-shirts are made in the Uoited States. The Fruit of the Loom logo, a cresent shape of grapes and an apple.

The fad has become so hot that many shops have run out. French merchants have begun to manufac-ture others with similar fruit baskets hut with different slogans such as "Fruit of the Son," "Fruit of Love" and "Fruit Cup." "My friends are making them in their basements." said one boutique owner on the Rue-St-Andre-des-Arts

Logo Lawsuits

According to Peter Felberbaum, a vice president of Fruit of the Loom, Inc., the number of np-offs is a growing concern to the company, which has initiated lawsuits in several countries to protect its 128-year old logo. The corporation would not say how many suits are involved.

Although the Fruit of the Loom fad reached its apex in Europe this summer, it actually began a few years ago. Fruit of the Loom's Italsportswear, in Florence, decided, according to Mr. Feiberhaum, to take the logo from the jockey shorts and emblazon it on the outside of garments. According to Jose Altue, owner of a boutique in one of the underground mails of the Champs-Elysees, models began to wear the

long T-shirts as nightgowns. The Fruit of the Loom (ad caught on in St. Tropez lass summer. This summer, traveling Germans, Dutch and Spaniards picked it up. ft moved north to Paris, Mr. Altur indicated that other T-shirts are difficult to

A young Japanese sipping coffee on the Boulevard St. Germaio had no idea why he had bought his Fruit of the Loom T-shirt except that it's "la mode." in Japan as well as here. "It's prettier to have a Tshirt with an inscription than with out one," said a Frenchwomen who wanted a "Frroot ov ze Loom" T-

shirt this week.
The minute the French can't understand the words," cracked a salesman, "they think it's chic."

Indeed, the French who wear the hirts have no idea what Fruit of the Loom means nor what it con-notes for Americans who have grown up with it. "Doesn't it mean passion fruit?" asked Brigitte Cassin, 20, who owns two of the T-shirts. "Doesn't it have something to do with homosexuality!" guessed Bernard Laugier, a music student wearing a V-neck T-shin with a tiny emblem on the left side.

While Europeans are turned on to the Fruit T-shirts, Americans seem put off, "It's anti-chic chie," said one young U.S. woman, add-ing "ugh."

"I have the impression Ameri-cans are offended" said Mr. Djian

of the Venezia shop. One American speaking sarcastically, asked Mr. Djian for the name of a French underwear manufacturer so he could start a similar fad in the United States.

But the U.S. market has already been pre-empted. Looking at the success in Europe, Fruit of the Loom decided to pitch the T-shirts at the home market. And everybody knows that once a fashion succeeds in Paris, it's a sure thing in New York. This summer, Americans can buy Fruit of the Loom Tsbirts at Bloomingdales and other New York department stores.

But as Americans catch on, you

can be sure the Freneb will be on to something new. And they are, Mickey Mouse T-shirts are going to be the next fad, says Mr. Djian. After all, it's Mickey's 50th birthday.

Six Sins Too Many Make Brecht-Weill a Bit Deadly

By Henry Pleasants

L ONDON. Aug. 23 (1HT) — ingenious and imaginative production, strongly supported by Rich ard Alston's choreography and the evocative sets by Ralph Koltai and oliseum last night with a new production of Kurt Weili and Bertolt Brecht's "The Seven Deadly Sins of Ordinary People," paining it ap-propriately with a revival of last season's admirable production of Puccini's "Gianni Schiechi."

If, in the event, the older production comes over as the more effective of the two, it is probably be-cause one sin (greed) is sin enough for a one-acter. Brecht and Weill, in their oddly conceived satire - a tenuous blend of ballet, cantata and musical - packed seven sins into less than 40 minutes, with the result that oo one of them has space for properly sinful elabora-

Still, the piece bas charm, thanks primarily to Weill's saucy tunes, cheeky rhythms and subtly astringent scoring, and it is the charm that is emphasized and enhanced in Michael Geliot's characteristically

Nadine Baylis. One imagines that Lotte Lenga and Tilly Losch, the Anna l and Anna 2 of the original Paris production of 1933, may have made more of the sinister duality of idealist and opportunist common to "Ordinary People" than did Julie

Covington and Siobhan Davies last night, although both performed delightfully,
Possibly too delightfully, which
may bave had something to do with their heing rather upstaged by the male quartet representing Anna's abundantly sinful family, and espe-cially by the veteran Dennis Wicks

in the basso travesty role of the mother. The in-depth strength in person-nel of the English National Open-was vividly reflected in a "Gianna Schicchi" season, most notably the new and marvelously rustic and ro guish Schicchi of Eric Shilling.

Toshiba, Rank Form Joint TV Venture

LONDON, Aug. 23 (AP-DI) — support of both the British govern-Tokyo Shibaura Electric is to be-support of both the British govern-ment and TV industry unions. Subsidiary.

Alan Williams, minister of state

TV-industry sources said that al-

for industry, announced that the

government is making a grant of £1.95 million to Rank Toshiba to

belp the new company with its ex-

pansion plans.

He said the Toshiba agreement
"is an excellent example of the
joint venture approach which I
have been urging Japanese companies to consider when planning inward investment in Britain."

Rank expects to produce about 175,000 color TVs this year, but plans are for Rank Toshiba to

boost this output to 350,000 sets by

1981, with 40 percent of this production being sold under Toshiba brand names and the remainder under Rank brand names.

Rank Toshiba will also make monocbrome TV sets and audio

Rank's main contribution to the

joint venture are its manufacturing facilities at Plymouth and Redruth in Cornwall, which employ about

3,000 persons. Rank suffered an

operating loss of £3.2 million on its TV and audio products operations

last vear.

Toshiba is putting up £3 million cash for the venture, "plus access to its highly valued technology," the Rank announcement on the joint venture said. Rank made it clear

that it hoped to benefit from the

The British company said Toshi-

ba "is in a very strong position in

FINANCIAL NEWS AND NOTES

AMC Said Suspending New Designs

American Motors Corp. has quietly suspended design engineering on future car lines. Instead, the no.4 U.S. automaker has focused the attention of its engineers solely on two new Jeep vehicles and on making sure that the French-made Renault cars it has agreed to market in the United States will meet stringent Federal regulations, it has been learned.

AMC officials decline to comment on the report. Industry observers, bowever, suggest that such a move would be a logical step for the smallest of the Big Four auto manufacturers. Jeeps represent the fastest selling of the AMC lines, they oote, and the company's financial future hinges on the outcome of its current oegotiations with Renault, the French government-owned auto maker. The talks center on a joint design, manufacturing and distrubution program uoder which AMC reportedly would market Renault cars in the United States in exchange for a \$100 million loan. Meanwhile, AMC tentatively raised the prices on its 1979-model automobiles an average 4.6 percent, or \$235 each, from the 1978

China Forms Joint Ventures

Itoman & Co. says it will start a joint venture to produce textile goods with China's National Textile import and Export Corp. starting next year. It will supply Chioa with production facilities and technical expertise, and import the linished goods to Japan. The first step in the venture will be to produce pajamas, officials say. Meanwhile, Sulzer Brother reports it has signed a licensing agreement with China's National Technical Import Corp. under which China will be able to produce Sulzer der which China will be able to produce Sulzer diesel-marine engines. Sulzer said that China was planning to expand its merchant fleet and that the agreement covered production under license of large, slow-running, two-stroke diesel engines. China

also has ordered a \$35 million synthetic leather manufacturing plant from a group of Japanese companies, IGC Corp., a leading engineering firm, says. The deal will be formally signed in Peking Sept. 1. The plant will be expable of producing 10,000 tons of MDI (diphenylmethane disocyanate), the material for synthetic leather beginning 1931. al for synthetic leather beginning 1981.

BP to Consolidate Sohio Results

British Petroleum says that its results for the secand quarter of 1978, due Sept. 7, will for the first time include the income of its Standard Oil Co. subsidiary of the United States on a fully consolidated basis. June 16. BP earned a majority voting interest in Sohio as a result of the sustainable net production from its Prudhoe Bay properties in Alaska reaching 450,000 barrels a day. Now that BP's interest exceeds 50 perceot, U.K. accounting practices require BP to consolidate fully Sohio's results into BP group accounts. Io doing so, it said, BP is required to adjust Sohio's results so that their seconds. just Sohio's results so that they are computed on a basis consistent with BP's accounting policies where these differ — principally concerning stock valuation and deferred taxation.

IBM Limits Price Rises to 4%

International Business Machines pledged to hold its price boosts to less than 4 percent this year and its average increase in employee compensation to less than the average of the past two years. But the promise, made by IBM board chairman Frank Cary io a letter to Carter administration inflation counselnr Robert Strauss, is somewhat diminished because the company has been under competitive pressure to cut prices, and its costs for some raw materials have declined. Mr. Cary even added that because its 1976 and 1977 price increases were "extremely small," the company may exceed the administration's official guideline of holding price rises to less than the average of the past two years.

NYSE Prices Higher Along a Broad Front NEW YORK, Aug. 23 (Reuters)

 Gains by computer and gaming stocks highlighted a broad advance on the New York Stock Exchange today that was temepered by profit taking.

Analysis said investors were encouraged by U.S. moves to prop up the dollar, by a fall in U.S. durable

goods orders and by Saudi opposi-uon to a 1978 rise in oil price.

The Dow Jones industrial aver-age rose 4.59 points to 897, and ad-vances led declines 1.021 to 485.

Volume rose to 39.63 million shares from yesterday's 29.62 million.

Pan Am Bid for National

National Airlines said Pan American World Airways made an unsolicited merger proposal on the basis of a cash offer to National shareholders of \$35 a share. National said it has directed Morgan Stanley, its financial advisers, to analyze the details of the proposal. Pan Am, which led the active list, rose % to 8%. National did not trade today but it closed yesterday

Among computer issues, IBM climbed to 300% before easing to 297% for a gain of 1% on the day. Control Data added 1% to 41%, NCR % to 65% and Data General 14 to 64%. Data Terminal Systems, resporting higher second-quarter earnings, rose 14 to 43%. Prime Computer 1% to 35% and Storage Technology 1% to 30%.

Among gaming issues, Caesars World added 2¼ to 31%, Bally Manufacturing 2½ to 47%, Playboy ½ to 24% and M-G-M 1½ to 43%.

Prices on the American Stock Exchange also rose, with the mar-ket-value index up 0.92 points to 165.67. In Chicago, wheat was fractionally higher, corn was lower, oats were mixed and soybeans were higher ot

the close today on the Board of Trade,

pected to remain farily thin until the U.S. trade results are posted. They are scheduled to be released to break the news to the banking next week.

Against the Swiss franc, the dol-The campaign that he undertook met at first with stiff resistance. But lar ended at 1.6645 francs, up from 1.6580 francs late yesterday but when BB lowered its interest rates down from its morning level of to force down the market rate, its 1.6950 francs. Against the French sheer bulk forced other banks to franc, the dollar closed at 4.3875. swallow their misgivings and go up 30 points from overnight levels along.
Actions such as these have led but well below its high of 4.4320 private bankers here - Brazilian

francs early in the day.

The dollar rose to 193.10 yen in the first hour of European trading and foreign — to lonk upon BB more as the nation's de facto monebut by the end of the session it tary authority than as an ordinary bank. The Banco do Brasil is more dropped to 191.60 yen, up 80 of a central bank than even the Banco Central itself," claims Luiz

points on the day.

Sterling, which had slipped to around \$1.9165, finished at \$1.9260, down a half a cent from

Following the Treasury decreed drains on Banco do Brasil's announcement, an official indicatprofitability, the institution's outlook continues bright, at least so ed that there could be further gold sales beyond February. "We'll decide by December or January long as it continues to occupy its position as a semi-official arm of the Brazilian government. whether and what will come next." he said

Treasury officials would not comment on what other measures might be taken, but they emphasized that President Carter had promised a series of steps, indicating that other moves by the govenment are in the offing.

Wheat was up 5 to 5% cents; corn was off 1 to 2%, oats were off 3 to up 14, and soybeans were up 9 to 12 cents.

U.S. Orders Down 5.5% In Durables

WASHINGTON, Aug. 23 (AP-DJ) — New factory orders for durable goods dropped a seasonally adjusted 5.5 percent in July, the Commerce Department reported

today.

Orders fell to an adjusted \$65.07 billion last month after falling 1.7 percent in June to an adjusted up-ward revised \$68.84 billion and was unchanged in May from April at an adjusted \$70.05 billion.

The department said three-lourths of the decline was due to a 16.3-percent drop in transportation equipment orders. The aircraft mis-siles and parts industry was the main contributor to this decline.

The department said the July decline was the largest since December 1974 when new orders for durable goods dropped 8.6 percent. New orders for non-defense capital goods, considered an indicator of future plant and equipment spend-ing, fell 8.2 percent in July to an adjusted \$16.67 billion following an increase of 0.2 percent in June to an adjusted \$18.16 billion and an increase of 4.1 percent in May to \$18.12 billion.

U.S. Consumers

Less Confident NEW YORK, Aug. 23 (UPI) —

U.S. consumer confidence has plunged 15 percent since January, with declines recorded in five of the six months through July, the Conference Board reported today.

lts consumer confidence index (hased 1969-70) eased to 88.8 in July, a drop of 3.7 points from the previous month. The board's huying-plans index (ell more than 30 points — from 121.7 in June to 91.2 in July — to its lunger to point in the property of the page 1 point in the previous months. in July — to its lowest point since the spring of 1975.

The survey showed that more than 12 percent of the respondants expected a worsening of husiness conditions, compared to less than 11 percent in June; more than 20 percent expected fewer job openings, against 18.5 percent in June, while 29 percent expected un increase in incomes, against 33 per-

Consumer huying plans declined in all areas covered by the study automobiles, homes, and major

appliances. On purchases of major appliances, about 26 percent said they planned to do so, while a month ago the figure was 30 percent.

U.S. Narrows Deficit

This advertisement appears

as a matter of record only.

WASHINGTON, Aug. 23 (AP-DJ) — The federal government had a \$7.23 billion budget deficit io July compared with a \$8.68-billion deficit a year earlier. The Treasury said that io June the government had a \$9,06-billion surplus. Receipts in July were \$29.19 billion, down from \$47.66 billioo in June but up from \$24.97 billion in July 1977.

Take advantage of the best news deal in the world and save money!

M Latine

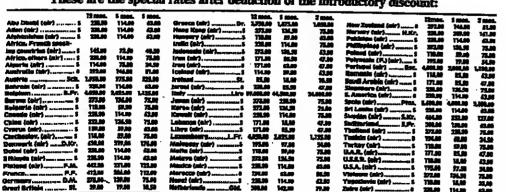

Subscribe today to the International Herald Tribune and start receiving Europe's only international newspaper every day for less money than you'd pay on the newsstand.

You'll be making the most sensible news buy possible. And you'll be getting unequalled coverage of important world news, incisive articles by columnists and business and finance pages that offer international businessmen exactly what they need to know.

New subscribers will save 25% on our regular subscription offer (which in itself is a substantial saving over newsstand prices). Depending on your country of residence, that saving could be as much as 47% of the newsstand price!

Complete the coupon below and start getting more world news for

less money today! These are the special rates after deduction of the introductory discount:

Please send the newspaper by mail for:

12 months

6 months

3 months Saving 25% of the regular subscription rate.

ADDRESS. COUNTRY_

Important: PAYMENT MUST BE ENCLOSED WITH ORDER TO: International Herald Tribune, 181 avenue Charles-de-Gaulle, 92200 Neullly-sur-Seine, France. For accounting purposes, pro-forms involces are available on request. THIS OFFER FOR FIRST TIME SUBSCRIBERS ONLY

This offer valid through December 31, 1978.

THE PACIFIC WAR

World War II and the Japanese, 1931-1945 By Saburo Jenaga, Pantheon Books, 316 pp. \$10.

Reviewed by Drew Middleton

THE JAPANESE experience during World War II. which for Japan began with the initial moves against Chioa in 1931, was for the destruction of democracy, one of the most traumatic ever experienced by a belligerent oation. The Japanese moved in those 14 years from triumph to seeming tragedy, suffered enormous losses to blood and treasure, and to the final phase endured two attacks by

atomic weapons.

The public is fairly well acquainted with the military history of the war. But Americans and Europeans, except for academic specialists, have little knowledge of what went on in Japan and in the conquered territories during that period. "The Pacific War" provides that the control of th that picture in elaborate and sometimes terrifying detail. f believe that no ooe can really understand contemporary Japan and its poli-cies unless be is acquainted with the grim story Saburo fenaga pre-

There is a definite bias to the account, which robs it of some of its validity. Anyone who writes, as lenaga does, that "American aggressioo in Korea, the Taiwan Straits and Vietnam is a replay of the Japan-China war either is ignorant of history in the largest sense

One of the more effective secnons of the book deals with the ex-tent of the military's cootrol of Japan's government. Americans tend to regard the German Army's influence in Wilhelmian Germany as a yardstick in this area. As this book makes clear, the Japanese Army and to a lesser extent, the Navy ruled Japan from 1931 onward. Not under Wilhelm II and certainly oot under Hitler did the German staff exercise comparable

authority.
In 1940, for example, the army's vice minister and the vice chief of staff decided that the civilian cabinet should be replaced to expedite conclusion of a military alliance with Germany and Italy. The chief of staff, Prince Kan'in, agreed. In that somewhat cloudy language used for all great Japanese deci-sions, he said. "If a majority of the army regard a cabinet change as necessary, in the interests of the country extraordinary measures would be uoavoidable."

Ienaga's treatment of the motivations for the Japanese adventure in China puts economic domination of China as the principal objective. But f question whether his emphasis on "the defeose against Communism" is warranted, Clearly, the Japanese high command was strongly anti-Communist. But the Soviet Union of 1933 could not be considered a formidable foe. Nor is his statement that "the laten common interest in Japan's anti-Communist crusade" made "America and England willing to tolcrate a considerable erosion of their position in China" acceptable.

Washington and London by the start of World War II clearly recogsome economic interests did not. But in 1941, faced with both the German and Japanese threats, the two Western governments chose Hitler's Germany as the primary

foe.

The West's handling of relations with Jopan in this period was often maladroit. But this did oot arise from any friendly feeling for Japan as an anti-Communist power. Ger-many in the summer of 1941 simply appeared a more dangerous enemy than Japan.

The Japanese armed services did

provided an excuse for the elimina-tion of political opposition and for the imposition of rigid censorship. News of the navy's defent at Mid way by the Americans and the army's disastrous Imphal campalin against the British was suppressed.
The withdrawal from Guadacans
was euphemisucally termed "transfer of lorces" and the store bomb. One result was that when impli-al Japan sank into defeat in 1945

for the destruction of democracy, such as it was, in Japan, By 1934, civil liberties were under attack and

Army Minister Araki Sadao pro-posed "the most severe methods"

against "Communist or treasonous activities carried out by legal groups" disseminating and war and

anti-imperialist ideas.

The pace of repression, if anything, was faster in Japan than in

Germaoy, largely because the for-mer was involved in an important

military operation in China. This

millions of people were impro-manual millions of people were impro-pared. Another was that because of the censorship, the Japanese at home did not know of the atrocities committed by their forces in China Malaysia, the Philippioes and the East Iodies. Instead, they had been fed on a constant diet of measurable that extolled the bravery and state na of the imperial forces and reculed the Chinese, U.S. and British

Japan was, in fact, a classic example of the totalitarian state entangled in its own lies to the ultimate point at which a people can-not be roused for one more effort because truth is dead. As Winston Churchill demonstrated in 1940, the brutal facts of a national situa-

tion can inspire a people to mex-ampled heights of sacrifice. "The Pacific War" has its flaws. Ienaga in his opening chapters makes much of the military's repression of free speech, has toward the end he cites voices that continued to speak, albeit in an oblique style; against the government and the war. But he does get behind the accepted views of the day. There was, he emphasizes, oo East Asian co-prosperity sphere, only a "war-wasted region where the people's independence and their very lives were devastated by brutal military oppression and economi exploitation."

There is also a tendency toward simplifying the complex issues that led the Japanese, already deeply committed in China, to attack the Americans, British and Dutch, The I author sees that choice as between 1:halting the war in China, after a tremendous investment, or expanding it to get oil. Japan, he argues, went to war because of its lack of the Mile resources. But lenaga emphasizes the sad inevitability of the wider ing of the war that stemmed from the invasion of China. Aggression of the 15-year war.

The final paradox was that many of the admirals and generals who eothusiasucally supported the strike at Pearl Harbor and the alvance into Malaya really had to confidence that they would win the larger war.

Drew Middleson is a military cotrespondent for The New York Times

Spaniard Killed In Bull-Running

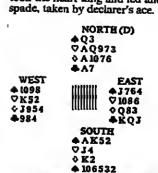

BILBAO, Spain, Aug. 23 (UP — A bus stop shelter over with youths jumping up to escape charging bull collapsed today kills. ing one and injuring 10.

Relief at Customs

A new \$100-million terminal being built by a West German firm right now should ease the pain of passing through customs and immigrations formalities, which can now stretch out into a two-hour ordeal at antiquated Sheremetyevo. Whether the agonizing waits in line prearranged itineraries. Some at restaurants and refreshment Olympic buffs may flad themselves stands is something else that can be being whisked away on overnight eliminated is less certain.

tion line here for its "Fanta" beverages. Vending machines will proba-bly dispense Fania. Coke, and even the Soviet "kvass" not only in the village but at most of the spectator areas aaround the city. As for quick food - definitely

not a Soviet specialty --McDonald's of Canada has been here trying to get a franchise as well. Rumor has it that the company may soon be allowed to set up a demonstration unit in downtown Moscow - with hamburgers but without yellow arches.

Crews From Across Nation

Out at the Olympic Village, seven of the planned 18 residential buildings have already finished, rising out of a sea of mud and construction jumble. A polyglot crew of workers from all over the country is being urged on by such signs as "Let's Build the Polyclinic with

Excellent-Quality Work!"
The village is far from downtown and probably will strike its inhabitants as isolated. It is, however, in the heavily-populated southwest Moscow housing project area and hardly a Poternkin village by any standard.

Art Buchwald

Jackie Is Coming!!

Kennedy Onassis had purchased 375 acres of one of the most im-portant tracts of land on this island, no one has talked about anything else. Reactions have ranged from fear and apprehension

to excitement and envy that one of the world's most famous women had decided to make the Vinevard her summer retreat.

Μv phone hasn't stopped ringing since the story lished. was pub-

Buchwald One lady who knows everything called and said. Did you hear that Bergdorf Goodman is breaking ground for a new store next to Jackie's land?"
"I hadn't heard that," I said.

"Yes, it will be in the same complex with Gucci. Van Cleef and Arpels, and Halston's, who have all devided to build next to her." 'That's fantastic. What about

Yves Saint Laurent? "He's building in Apelier down the road with Saks Fifth Avenue in the same mall. It will be just behind the New York Museum of Modern Art annex.

The Museum of Modern Art is going to have an annex on the Vineyard?"

"Of course, Jackie loves art." Gosh, I said. this is exciting. Keep me posted in case you hear The next morning my informant

was on the phone again.

"I heard at the post office that everyone in East Hampton is sell-ing his home and moving up here." "What on earth for?"

To be where the action is. East Hampton is out now and the Vineyard is the place to be."

"But Jackie hasn't even built a house yet, Maybe she won't." Then what are the French inte-

Blue-Eyed Dolls Of Japan Come **Out of Closet**

By William Chapman TORYO (WP) — After years of hiding. Japan's blue-eyed dolls have come out of the closet.

A group of 31 dolls—their dresses frayed and their skin darkened with age—have gone on display as part of Japan's commen-oration of the end of World War II.

The blue-eyed dolls are among perhaps 100 survivors of more than 12,000 sent to Japan by Americans in 1927 as a gesture of

international friendship and goodwill.

At first accorded places of honor in primary schools and kindergartens throughout the country, the dolls fell victim to wartime purges. Schools were pressured by military organizations to destroy them as an exor-

cism of the American enemy's spirit.

Some were burned in schoolyards. All disappeared gradually from public view. The survivors, treasured by their owners, were hidden away in attics or concealed in stor-

It was risky business. One was given by a school principal to a friend with a letter of instruction to "hide this prisoner."

Five Years Ago

Five years ago, Ayako Ishimaru discovered that one of the dolls had resurfaced in a school in north-central Japan. Struck by the doll's survival "through such harsh times, she attempted to track down the original donor, a man who lived in Rochester, N.Y. He had died. Mrs. Ishimaru did a little homework and

VISE

人形查證

A survivor of Japan's purge of blue-eyed dolls.

found that of about 100 dolls sent to her prefecture in 1927, only three had survived. Last year, she sponsored a ceremony of consolation. The publicity attracted attention throughout Japan and the dolls began popping up all around the country.

As the 3I went on display during a brief ceremony, the wife of Foreign Minister Sunao Sonoda recalled that her school once owned one. Later, Aiyoshi Kawabata, a professor em-

eritus at Kyodo University and a doll hobhyist who helped organize the event, re-called in an interview the days when the dolls disappeared.

During the war, he said, the hostility toward Americans became very strong. It is not true, as some reports have had it, that the doll-purging orders came from high mili-tary sources, he said. Rather, it was local

N"

pressure from military groups and organiza-tions of retired soldiers that forced the schools to get rid of them.

The dolls were widely admired and were

given places of honor in the schools. Kawahata recalled, and the authorities feared that such affection interfered with the effort to picture Americans as enemies. So the schools were required to destroy them.

Dark Places

Those which escaped destruction were hidden away in dark places between ceilings and roofs or in storage boxes where they were covered over with other memorabilia.

Most of the recovered dolls have been turned up in rural areas. The reason is that those which had been preserved in the cities were destroyed by the U.S. bombing raids. Kawabata explained.

The dolls came to Japan accompanied by tags identifying the donors with such names as the "San Mateo, Calif. Blue Jay CLub." or the "Committee on World Friendship Among Children." According to the available records, 12,739 dolls were sent to Japan under the auspices of an organization called "Doll Messengers of Friendship."

Mitsukoshi department store, which spon-

sored the resurrection ceremony, plans to market copies of the blue-eyed dolls, and the first ones have gone on sale, priced from \$54 to \$444.

Japan also commemorated the end of World War II in a variety of other ways.
In a large Tokyo hall. Emperor Hirohito offered tribute to the 3.1 million Japanese who died in the war that ended in surrender 33 years ago.

But the most poignant scene for an American was the re-emergence of the blue-eved dolls, reviving memories of a half-centuryold goodwill mission that turned, literally, to ashes in the fever of wartime Japan,

PEOPLE: Bully marun Hull Campaign Trail Billy Martin Hits

Billy Martin, manager of the New York Yankees, is plunging into Minnesota politics, to help the campaign of a man who claims that he is the only boss who never fired Martin. Martin has announced that he will head a sportsmen's committee to campaign for U.S. Senate candidate Bob Short, and he joined Short at campaign stops at Duluth. Moorhead and Rochester. Short, a millionaire hotel owner, is former owner of the Washington Senators. Texas Rangers and Los Angeles Lakers. Martin managed the Rangers when Short owned them, but Short sold his interest in the elub before Mortin was fired by Short's successor, Brad Corbett. Short is opposing Rep. Donald Fraser in the Democratic-Farmer-Labor primary Sept. 12.

In Washington, Melina Mercouri, the actress and Greek legislator, said that it should be feasible to save the Acropolis in Athens "if we don't spend money on things that people don't need." Most American don't need." Most American don't need." cans don't really know how bad pollution can be, she said, because they have not seen how disastrous it is in cities like Athens and the port of Piraeus, which she represents in the Greek parliament. Unesco has offered to help preserve the structures on the Acropolis, some of them now supported by steel frameworks, but the Greek government has responded in effect, she said, "We don't want your money, we will do it alone." But at the same time the government says that it can't afford the expensive restoration project needed, she said.

Cincinnati Reds baseball player Pete Rose has picked up a couple of namesakes — of the cubs kind. New York City's Brons Zoo decided to name two snow leopard cubs, born nine days before Rose began his 44-game National League record hitting streak on June 14, after the baseball star. They were born to Mr. Cran, a male on loan from the Cincinnati Zoo. and Shanda, described by 200 officials as "a lonely female." Cub Pete will eventually be sent to Cincinnati to rejoin his father, and Rose will stay with her mother.

John Ehrlichman, out of jail after 15 months served for his role in Watergate, is returning to public

broadcast Monday through Friday at his home in Santa Fe, N.M., commentaries. Little says, which will offer "the unvarnished views of a man who has been there and knows what he is talking about."

For 28 years Texas Democrat Olin "Tiger" Teague has represented a congressional district south of Dallas, and he has snared his share of military and space projects for his home state as chairman of the House Committee on Science and Technology. In the middle of next month he will be toosted at a dinner at Texas A&M in College Station during a national scientific symposium. Along with the House leaderhip, two other men have been invited: Richard Nixon and Leon Jaworski. Teague's office said that neither man has declined - or accepted - the invitation.

According to the woman who has sold newspapers and periodicals to Capitol Hill employees for 28 years. Penthouse is the most popular over-the-counter magazine sold to congressional staffers. And the Senate Intelligence Committee and the offices of Edward Kennedy and Daniel Moynihan charge the most newspapers and magazines each month. The source is Ann Cooper, an Ohio native who came to Washington in the late '40s.

New Hampshire Gov. Meldrim Thomson, who has battled anti-nuclear demonstrators, high taxes and court rulings, is venturing into the world of popular music in his fight for re-election. Scheduled for re-lease is "Live Free or Die," a 45rom single which touts the colonial virtues of New Hampshire and carnes Thomson's campaign message, "We are hoping that everyone will be tapping their toes to this song by November," said Peter Thomson. Thomson's son and campaign manager. "Live free or die, don't let the freedom pass you by. Stand up proud and strong and lead this country on," a group sings on side one, which offers the message that the virtues which once made America great now exist almost exclusively in New Hampshire.
